

ASX Announcement

22 February 2017

Superloop signs Australian Capacity Agreement

Superloop Limited (**ASX: SLC**) is pleased to advise that it has signed a 15 year Indefeasible Right of Use (“IRU”) agreement with Vocus Group Limited (“Vocus”) for international, intercapital, regional Ethernet access and metropolitan fibre capacity in Australia.

The deal sees Superloop working with Vocus to immediately upscale its metro, national and international capacity. The value of the deal is in excess of \$20 million over 15 years and allows Superloop to realise greater cost synergies from the BigAir acquisition as well as provide a platform for the delivery of scalable services in Australia as part of the Superloop pan-Asian network.

The IRU represents a good deal for both parties as working with Vocus minimises the requirement for significant infrastructure build by Superloop to attain cost and network synergies in the already competitive Australian market.

Services will commence coming online around July 2017 with synergies through migration of some services being realised soon after.

About Superloop

Superloop is a leading independent provider of digital services in the Asia Pacific region.

The Group owns and operates over 540km of fibre networks in Australia, Singapore and Hong Kong, connecting over 70 of the region’s key data centres. The network is continually expanding with further diverse connections recently completed to the Singapore Exchange, IO and NTT data centres in Singapore.

In Hong Kong, Superloop has established a 110km fibre optic network to initially connect 30 strategic sites including the Hong Kong Stock Exchange data centre. The Company has constructed TKO Express, the first submarine cable to connect the traditional carrier hotels located in Chai Wan on Hong Kong Island and the data centre campus located at Hong Kong Science and Technology Park’s Tseung Kwan O Industrial Estate on the mainland, providing much needed physical diversity and a low latency path between Hong Kong’s major finance and technology hubs. TKO Express is the world’s largest fibre core count subsea cable system.

The Group also operates businesses including BigAir Group, APEXNetworks and CINENET Systems.
